Why get certified with CyberSmart?

Cybersecurity certifications provide a framework that outlines the tools, processes, and policies you must implement to protect yourself against online threats.

By achieving Cyber Essentials or Cyber Essentials Plus, not only does it protect your business against cyberthreats, it also shows your prospects, customers, suppliers and partners that you operate to the highest cybersecurity standards, building trust and helping you win business.

You may be thinking "**why should my business get certified with CyberSmart?**". Here's everything you need to know:

We're fast

We commit to getting you certified as quickly as possible, often in a matter of hours rather than weeks.

You'll pass first time

Our smart platform checks your answers as you go, ensuring you're likely to pass before submission.

Unlimited guidance

We offer step-by-step guidance through the process and unlimited live support to get you passed quickly and first time.

We offer ongoing risk management

Cyber Essentials is a great first step towards improved cybersecurity. However, true cyber protection requires ongoing risk management. So, we offer £25k free cyber insurance coverage with certification through our partners Sutcliffe & Co.

Our cyber insurance goes beyond the coverage of financial loss and fines caused by the cyber event, providing our customers with access to response professionals and resources throughout the incidents.

And, we also offer our cyber risk management tool, CyberSmart Active Protect, as part of our certification bundles – allowing you to take control of your cyber risk.

No charges for extra submissions

Unlike other providers, we only charge once for the submission and assessment of the your answers. If a customer answer a question incorrectly, our auditors simply send back that question – complete with guidance on how to make the answer compliant.

This process can be repeated for as long as it takes to get you certified with no extra charges, saving you money.

We're the UK's number 1 certification body

We're the UK's largest cybersecurity certification body. We're trusted by world-leading businesses to deliver their certifications, fast. So no matter the size of your business, they're safe with us.

Upgrading to Cyber Essentials Plus is simple

If you wish to go a step further, we also offer Cyber Essentials Plus. It's a simple upgrade within 90 days of completing Cyber Essentials. And, like all our certifications, our Cyber Essentials Plus is assessed by our team of expert in-house auditors.
