How To Protect Against Business Email Compromise (BEC)

BEC attacks are increasingly sophisticated and can lead to significant financial losses, reputational damage, and data breaches. Protecting against BEC is a critical step to safeguard your organization. Use this checklist to ensure you get the critical features required for comprehensive identity security.

- [ ] **24/7 Monitoring**

  Continuous monitoring of suspicious email activity by identity experts.

- [ ] **Immediate Threat Isolation**

  Contains suspicious activities and prevents further access if an account is compromised.

- [ ] **Business Continuity**

  Proactive monitoring and rapid response minimize downtime and losses for your business.

- [ ] **Accurate Alerts and Reporting**

  Accurate alerts and comprehensive incident reports enable quick action.

- [ ] **Guided Remediation**

  Get your business running again quickly with tailored recommendations and step-by-step guidance.

- [ ] **Customized Alerts**

  Reduce unnecessary interruptions that aren't pertinent to your business.

- [ ] **Seamless Integration**

  Easy deployment and integration with Microsoft 365 without disrupting your regular work activities.

- [ ] **Expert Support**

  Cybersecurity experts who help guide your team through remediation and threat resolution.

- [ ] **Transparent Costs**

  Clear, predictable pricing helps you maintain cost-effective security for your business.
