CyberSmart Learn

What is CyberSmart Learn?

CyberSmart Learn is a fully customisable, scalable, and comprehensive security awareness training platform designed to deliver a world-class learning experience with real-time reporting and tailored training for organisations of all sizes.

Empower your team with engaging security awareness training

CyberSmart Learn provides comprehensive security awareness training to keep your organisation protected against evolving cyber threats.

Benefits

Comprehensive Security Training

Access a broad range of courses, from basic security awareness to advanced topics.

Real-Time Progress Tracking

Monitor learning engagement and identify at-risk areas.

Customisable Learning Paths

Tailor training to specific job roles or compliance needs.

Scalable & Accessible

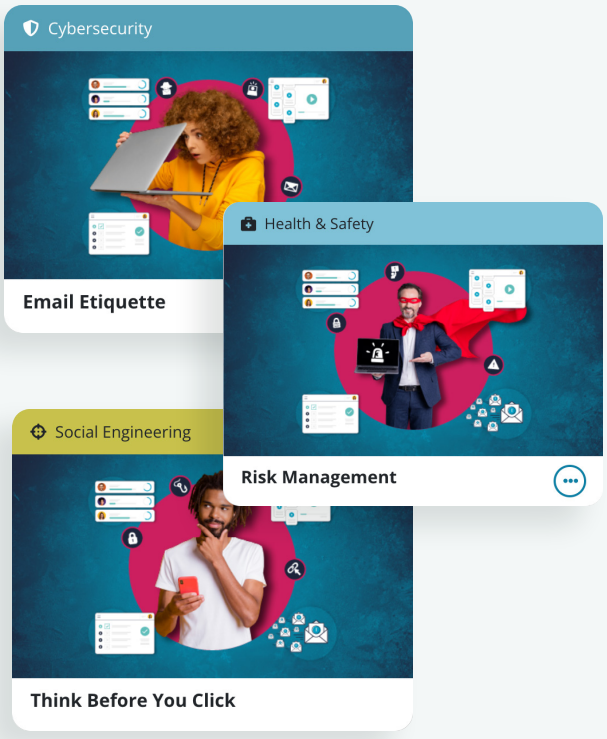
Easily onboard teams of any size with an intuitive, user-friendly platform.

Regulatory Compliance

Simplify meeting industry security and compliance requirements.

CyberSmart Phish

Conduct phishing simulations to test and educate employees, strengthening your organisation's first line of defence.



Does this replace the existing Academy training in Active Protect?

The current Academy training users get with our Active Protect software is changing its name to CyberSmart Learn Lite. This remains the same simple, easy-to-implement training solution included with Active Protect. The only change is the name—users will still have access to all the same features.
